

Monthly Air Pollution Control Program Summary Report

Concerns Received or Investigated Between

June 16, 2024 and July 15, 2024

Concerns Received During Report Period

	Total
Total	83
Asbestos	6
Fugitive Particulate Matter	14
Hazardous Air Pollutant Release	2
Odor	22
Open Burning	29
Other	9
Particulates	1

Number of Notices of Violation (NOV) Issued: 0
 Number of Referral Notices of Violation (RNOV) Issued: 0
 Number of Letters of Warning (LOW) Issued: 0

Concerns Investigated During Report Period

	Total
Total	83
Concerns Received Before Report Period	7
Concerns Received During Report Period	76

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report

Concerns Received or Investigated Between

June 16, 2024 and July 15, 2024

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58072	6/11/2024	6/17/2024	Shane Mann	Open Burning	Linn Creek /Camden	SWRO	CR	Communication In Person
Concerned Party: Anonymous								
Concern Info: Webform - Neighbor dumped and is burning and has burned roofing shingles.								
Conclusions: SharePoint #9840								
I observed no evidence of illegal open burning during the investigation. No further action is required.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58097	6/13/2024	6/17/2024	Russell Tidabeck	Fugitive Particulate Matter	Seneca /Newton	SWRO	BD	Site Visit
Concerned Party: Jerrod Eidson								
Concern Info: Caller states that American Tripoli is releasing fugitive particulate matter beyond its property boundaries around noontime on 6/13/2024.								
Conclusions: SharePoint #9870								
No violations of 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin were observed due to the facility being down for maintenance. The maintenance did not result in any reports or instances of fugitive emissions, and therefore a SSM notification is not required for this maintenance activity.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58098	6/13/2024	6/17/2024	Ken M	Open Dumps: Construction and Demolition Open Burning		SWRO	CR	Other
					/Morgan			
Concerned Party:	Anonymous							
Concern Info:		Date of Incident or Date First Noticed: 06/02/2024 "there is a person that has an empty lot that has over the years burned and buried roofing shingles, black dock floating pads and other construction debris."						
Conclusions:	SharePoint #9866			I observed no evidence of the burial of solid waste or illegal open burning. No further action is required.				
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58105	6/14/2024	6/20/2024	Kathy Reed, Homeowner	Open Burning	Camden Point /Platte	KCRO	CK	Site Visit
Concerned Party:	Kathy							
Concern Info:		A month ago a storm knocked their neighbors tree over about a month ago. Neighbor burned the tree on their property. RP has been burning trash with the tree and the smoke has been hard to deal with. Caller believes that regulated material is in the pile. Pile smolders all day and burns bigger fires at night. Caller's main concern is the smell produced by the fire.						
Conclusions:		Open burning violations could not be confirmed at this time. No debris found in burn pile upon site investigation. Home owner denied burning prohibited items. Household gets regular garbage pickup. Burning appears to be from disposal of vegetative waste originating on site, specifically large trees that had fallen during a storm in April.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58106	6/14/2024	6/20/2024	City of Deepwater	Open Burning	Deepwater /Henry	KCRO	DS	Phone Conversation
Concerned Party:	Anonymous							
Concern Info:		The city is burning brush as well as insulation and other materials. They buried some of the material with dirt they get from cleaning out ditches. Taking place on the end of North H Street. Taking place on the Army Corps of Engineers. Burning of material taking place once a month. Caller stated that doorframes and plastic chairs are in the material burned. The mayor is the person in charge of the burning. Caller worried material is making it into Truman Lake.						
Conclusions:		According to the city, this site is only supposed to be used to drop off vegetative waste. They city did have some household waste dumped without permission. The city has taken steps to monitor the type of waste dropped off and deter unpermitted materials.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58113	6/17/2024	6/17/2024	Unknown	Odor	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:	Tannett Washington							
Concern Info:		From Webform - There is a terrible terrible smell off of Blue Ridge and Longview near the car wash and mall area, smells so bad. I'm thinking I hate to say it..... dead body. Please have someone check that area out, not able to go to the grocery store or restaurants in that area						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58124	6/17/2024	6/18/2024	IsoNova Technologies	Odor	/Lawrence	SWRO	JW	Email
Concerned Party:	Anonymous							
Concern Info:	Anonymous caller states his Amish neighbors and himself want to report a concern for IsoNova Technologies odors as of 11 a.m. on 6/17/24.							
Conclusions:	SharePoint #9912 I observed a violation of 10 CSR 10.6-165 from 8:40 a.m. through 9:04 a.m. but the facility manager, Dan Bowers, provided documentary proof that the facility had land applied odor-exempt fertilizer on the day of my investigation. As such, the violation was superseded by the agricultural exemption.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58125	6/17/2024	6/21/2024	Tommy Collum	Open Burning	/Camden	SWRO	BD	Site Visit
Concerned Party:	Anonymous							
Concern Info:	From Webform: At 360 county route P Camdenton mo. resident is burning stacks of pallets provided by High Brothers lumber in Camdenton, MO. Residence is owned by Tommy and Bobby Collum and is occupied by his daughter and unknown boyfriend, an employee of High Brothers. A High Brothers Lumber truck was seen dropping pallets off at the residence this spring. The stacks of pallets and the burn pile are near and easily visible from County Route P. The boyfriend resident attempts to hide pallets under brush when he burns them.							
Conclusions:	SharePoint #9906 I arrived to the property reported in the concern and observed a pile of approximately 10-12 untreated wood pallets that had been stacked in the front yard. A small burn pile was located in front of the pile of untreated pallets, but there was no observable waste in the burn pile that indicated anything other than the pallets had been burned. I tried to make contact with the tenants, but nobody was home at the time of my investigation. I left a doorhanger packet with the Open Burning Requirements and my contact information in case the tenant had any questions regarding the concern submitted.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58135	6/19/2024	6/27/2024	American Tripoli	Fugitive Particulate Matter	Seneca /Newton	SWRO	BD	Site Visit
Concerned Party:	Jerrod Eidson							
Concern Info:	Caller states that American Tripoli is running the mill and blowing dust all over Oneida St.							
Conclusions:	SharePoint #9936 No violations of 10 CSR 10-6.170 were observed and the facility appeared to be shut down at the time of the investigation. Indoor air testing with MSHA frequently results in the facility shutting down due to over exposure for workers inside the facility. The plant had recently had air testing the previous week.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58166	6/18/2024	6/25/2024	Mike Chastain	Open Burning	/Johnson	KCRO	DS	Site Visit
Concerned Party:	Jessica Brooks							
Concern Info:	Mike is burning copper in his driveway between the hours of 2am and 4am. The police department has been notified numerous times, and nothing has been done. The neighbor has recordings of the incidents, however we are having difficulty saving these to send in with report. Not only is this illegal it is also harmful for residents of neighborhood to be breathing in. His stash of burnt off copper is under a tarp on the west side of the house. House has no electricity or water which poses another threat for safety of homes nearby when he catches his own residence on fire.							
Conclusions:	At the time of investigation, no violations were observed. Holden Police Department is looking into the situation further. Police department was advised to contact MoDNR if they thought we could be of service.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58197	6/20/2024	6/20/2024	Braden Lore	Open Burning	Ozark /Christian	SWRO	BD	Email
Concerned Party:	Jeffery Haskins							
Concern Info:	RP is burning within 200 yards of the occupied structure of the CP- CP states it is about 50 yards. CP states it appears that they are only burning untreated wood and vegetative waste, but is only concerned now about the distance from their house. CP states that Braden is hauling the materials in and his parents, Amy and Steven Mitchell are burning it.							
Conclusions:	SharePoint #9940 No violations are being filed with the department at this time.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58201	6/20/2024	6/27/2024	Mermaid Cove Marina & RV Resort	Open Burning Land	Gravois Mills /Morgan	SWRO	CR	Communication In Person
Concerned Party:	Alan Wehmeyer							
Concern Info:	Alan Wehmeyer 913-449-4726 Mermaid Cove and RV Park Lake Road P (5MM) in Gravois Mills							
Conclusions:	RE: I received a call from Alan Wehmeyer regarding some burning at Lake of the Ozarks. Across the cove from his home, they were knocking down trees, burning them, and using diesel fuel to ignite the fire. Large black plumes of smoke were drifting over to different areas, including his side of the cove. He said it was making his throat burn and his voice to sound hoarse. He called the local fire department. He believes the diesel fuel is a hazardous waste and that this would affect the air quality.							
Conclusions:	SharePoint #9947 Open burning fact sheet was provided for information on land-clearing operations. No violation observed at this time and no further action required.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58203	6/20/2024		John Shaw	Open Burning Residential	/Jasper	SWRO	JW	
Concerned Party:	Tiffany Artinger, Mayor							
Concern Info:	No true street address is listed on Google Maps. Coordinates for the location are: 37.23450048738955, -94.41919094030895							
Conclusions:	Caller is still concerned with John Shaw's burning habits for scrapping. She states that he recently caught a structure in his yard on fire and emergency services had to respond, prompting her call. She also states that he often burns late at night and she believes he is burning a variety of regulated items for metal. There is a history of concerns at this location (9050, 8696, 8278, 7631, 4106), but no violations have been written in the past.							
Conclusions:	SharePoint #9953							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58208	6/17/2024	6/20/2024	Angela Potter	Asbestos	Boonville /Cooper	NERO	BH	
Concerned Party:	Jeff							
Concern Info:	Caller reports, the New Orleans House of Gumbo LLC located at 411 E. Ashley Rd., Boonville, MO, recently had a fire and are currently conducting a renovation of the structure. Caller is concerned that they did not do an asbestos inspection prior to the renovation. The department has not received a notification for that property.							
Conclusions:	on-site visit No violation at this time. Owner will complete an asbestos inspection once the building is released to her and provide NERO with a copy of that report.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58210	6/17/2024	6/20/2024	City of Tipton	Asbestos	Tipton /Moniteau	NERO	BH	Letter RTC
Concerned Party:	Jeff							
Concern Info:	Caller reports a former commercial phone building located on Wade Rd., next to the Tipton City Park, has been acquired by the City of Tipton and they are doing renovations without first conducting an asbestos inspection. The caller did not know the exact address of the building. Chris thinks the address could be 141 E Wade, Tipton, MO. The department has not received a notification for this property. Caller would like to be notified of the findings of the investigation.							
Conclusions:	Violation of NESHAP Subpart M; failure to have an asbestos inspection prior to renovation							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58210	6/17/2024	6/20/2024	City of Tipton	Asbestos	Tipton /Moniteau	NERO	BH	Letter UF
Concerned Party:	Jeff							
Concern Info:	Caller reports a former commercial phone building located on Wade Rd., next to the Tipton City Park, has been acquired by the City of Tipton and they are doing renovations without first conducting an asbestos inspection. The caller did not know the exact address of the building. Chris thinks the address could be 141 E Wade, Tipton, MO. The department has not received a notification for this property. Caller would like to be notified of the findings of the investigation.							
Conclusions:	Violation of NESHAP Subpart M; failure to have an asbestos inspection prior to renovation							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58212	6/21/2024	6/25/2024	Custom Pelleting Services	Fugitive Particulate Matter		SWRO	JW	Communication In Person
Concerned Party:	Jackie Mayne							
Concern Info:	Caller states that Custom Pelleting Services is causing excessive fugitive particulate matter that is getting everywhere and becoming a hazard. Powder has been bad for approximately one month. Caller states that lots of work is done after dark.							
Conclusions:	SharePoint #9969. I did not observe any violations during this investigation. No action is required.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58217	6/21/2024		unknown	Odor General Water	Webb City /Jasper	SWRO	BM	
Concerned Party:	Anonymous							
Concern Info:	Caller states that the water in center creek near Stones Corner Access smelled rancid and had 10 to 20 dead fish floating toward the bank. Caller stated water was oily and fish were bloated.							
Conclusions:	SharePoint #9968							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58223	6/24/2024	6/27/2024	Carlos Damien	Open Burning Open Dumps	Lee's Summit /Jackson	KCRO	JS	Site Visit
Concerned Party:	Dan Manley with Lee's Summit Fire Department							
Concern Info:	Liam Hazen with MoDNR's EER reported receiving a call from the local fire department, stated that they had extinguished an illegal dump that was lit on fire. The caller later stated that the burned area was approximately 50 feet long, 150 feet wide, and 30 feet deep. The caller sent a message to the duty officer that read, "Materials are everything you can name. Building materials, appliances, magnesium, household trash waste, mattresses, etc."							
Conclusions:	The cause of the fire is unknown and does not appear to have been intentional. No air violations are being issued. A Letter of Warning is being issued to Carlos Damien for solid waste regulation violations.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58224	6/24/2024	6/27/2024	Carlos Damien	Open Dumps Open Burning	Lee's Summit /Jackson	KCRO	MU	Communication In Person
Concerned Party:	Dan Manley - Lee's Summit Fire Department							
Concern Info:	Liam Hazen with MoDNR's EER reported receiving a call from the local fire department, stated that they had extinguished an illegal dump that was lit on fire. The caller later stated that the burned area was approximately 50 feet long, 150 feet wide, and 30 feet deep. The caller sent a message to the duty officer that read, "Materials are everything you can name. Building materials, appliances, magnesium, household trash waste, mattresses, etc." The location of the incident is listed as 2739 Southeast Hamblen Road.							
Conclusions:	Letter of Warning issued for solid waste violations.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58235	6/23/2024	6/25/2024	Mr. Watson	Hazardous Waste Containers Fugitive		SWRO /Dade	WH	Other
Concerned Party:	Anonymous							
Concern Info:	The following was copied from the Web Form: "Take 160.to you see muncys on right side You see trailers .go threw gate . They have hazard chemicals in drums outside back of paint shop. They also allow paint to soak into soil. Use fan to blow it out into air . Muilpe hazards.."							
Conclusions:	SharePoint #9989							
								Coose Trailer was recently investigated on June 13, 2024. See concerns 9864 and 9835
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58236	6/24/2024	6/27/2024	Unknown	Odor		SWRO /Barry	JW	Site Visit
Concerned Party:	Anonymous							
Concern Info:	The odor at my house is unbearable! I could not be outside of my home today and worse it even infiltrated into my home! This is unacceptable. Received via webform							
Conclusions:	SharePoint #9997							I did not observe any violations during this investigation. No action is required.
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58237	6/25/2024	6/25/2024	Unknown	Odor		SWRO /Jasper	JW	Site Visit
Concerned Party:	Steve Loftis							
Concern Info:	Mr. Loftis called to voice a concern regarding a very bad smell basically throughout Carterville. He did state that through the day it isn't as bad as late afternoon and evening. It is disgusting like someone cleaned out an old outhouse that had been being used. No one can really be outside in the evening, so no grilling or anything.							
Conclusions:	SharePoint #10000							I did not observe any violations during this investigation. No action is required.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58254	6/24/2024	6/25/2024	Mid-Continent Industrial Services	Fugitive Particulate Matter	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:	Anonymous							
Concern Info:	Sandblasting media not being contained inside the building. Released into the air, covering buildings, vehicles, clogs gutters. Media fills the area creating a constant haze.							
Conclusions:	This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58255	6/25/2024	6/25/2024	GENESYS Systems Integrator	Fugitive Particulate Matter Water	Kansas City /Jackson	KCRO	SH	
Concerned Party:	Kyle T. Watts							
Concern Info:	From Webform: GENESYS System Integrator is sandblasting equipment used in the manufacturing of fiberglass. Last week when I drove by you can see a huge cloud of rust colored dust coming from the back of the building. They are also using water as a part of this process and a strange pink colored water runs off unfettered to the public sewer. They have been doing this for years and have become more embolden as time goes on.							
Conclusions:	No further action							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58256	6/25/2024	7/2/2024	AA Quarry	Fugitive Particulate Matter	Kingsville /Johnson	KCRO	CK	Phone Conversation
Concerned Party:	Nelson Christensen							
Concern Info:	The concern party stated that at some point today their property was covered with dust from AA Quarry. They said that there was no dust yesterday but once they got home from work everything outside was covered in a layer of dust. They also informed me that the fan noise was still very loud.							
Conclusions:	It appears that dust from AA Quarry has gone past their property boundary. Particulate matter was observed on surfaces beyond the quarry's property boundary that appear to originate from the quarry's operations. An unsatisfactory findings letter will be issued to AA Quarry.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58264	6/26/2024		John Shaw	Residential Waste Disposal Open Burning	/Jasper			
Concerned Party:	Raven Robertson							
Concern Info:	CP states that their neighbor, John Shaw, has been burning the remnants of a trailer today. See concern #9953, investigated yesterday (6/25).							
Conclusions:	SharePoint #10019							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58266	6/15/2024	6/17/2024	Unknown	Odor	SLRO /St. Louis City		PG	
Concerned Party:	Anonymous							
Concern Info:	Received an odor concern that states strong acrid, rotten eggs odor is being experienced.							
Conclusions:	6/17/24-RLA- This is in the area where we usually received South St. Louis odor concerns. This is the 2nd concern we have had at this address.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58272	6/17/2024	6/25/2024	Norris Quarries-Trenton	Fugitive Particulate Matter	Trenton /Grundy	NERO	BH	
Concerned Party:	Alan Crawford							
Concern Info:	Caller reports that dust is really bad today from Norris Quarries on Highway 146 at Trenton. Dust is not coming from the haul road, but is coming from hauling of rock and possibly overburden from the quarry.							
Conclusions:	Site-Visit At the time of the investigation no violations were observed.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58273	6/25/2024	6/25/2024	Billy craig	Open Burning	Novinger /Adair	NERO	BH	Report UF
Concerned Party:	Chris Drennan							
Concern Info:	Corner of 10th and Main. Neighbor is literally burning tires right next to the road							
Conclusions:	On-site visit conducted Violation of Missouri Opening Burning Laws and Regulations Burned 6 tires. Issue Unsatisfactory Findings with Response Required on July 12, 2024.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58274	6/27/2024	6/27/2024	Ingredion	Opacity	North Kansas City /Clay	KCRO	JS	Site Visit
Concerned Party:	Scott Tost							
Concern Info:	Caller reports there are excessive emissions from the tall, skinny stack behind the building. Caller estimates emissions were at 60% today (June 27, 2024) at 11:50 a.m.							
Conclusions:	The facility reported there were some visible emissions during startup of the gluten dryer at approximately the time of the concern and that the issue was corrected. No violations were observed at the time of investigation.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58278	6/26/2024	6/27/2024	Evans basin	Odor	SWRO /Newton	JW		Site Visit
Concerned Party:	Randy Heatley							
Concern Info:	Randy Heatley called on 6/26 at 4:07 p.m. and stated that Denali odors at the Fairview basin are unbearable. Heatley wants to know when the basin will be emptied and whether Denali will fill the basin in with dirt. Heatley says the odor at the basin is persistent and is concerned that it will never be emptied. Heatley states that the weekend odors are the worst because that's when Denali mixes the basin.							
Conclusions:	SharePoint #10029. I did not observe any violations during this investigation. No action is required.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58284	6/27/2024	6/27/2024		Odor	Verona /Lawrence	SWRO	JW	
Concerned Party:	Robert Jungbluth							
Concern Info:	A concerning odor was experienced by the CP at the residence on 6/27/2024 from 5:00 pm to at least 9:00 pm (at which time the CP went inside). Wind was out of the north.							
Conclusions:	SharePoint #10033 While I was using the nasal ranger, I observed excessive odorous matter deriving from the IsoNova Technologies facility twice within an hour but not within 15 minutes, which is a violation of state odor regulations per the AOC signed in October 2023. This concern is assigned NOV SW issued //2024.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58285	6/27/2024	6/28/2024	Springfield Iron and Metal	Fugitive Particulate Matter Opacity	Springfield /Greene	SWRO	BD	Report
Concerned Party:	Anonymous							
Concern Info:	Large amounts of dusts observed emitting from a stack and pavilion on the south side of Springfield Iron and Metal.							
Conclusions:	SharePoint #10041 No violations of 10 CSR 10-6.170 were observed during the inspection.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58291	6/28/2024	6/28/2024	Universal Construction	Asbestos	Kansas City /Platte	KCRO	JS	Referred to Other Agency
Concerned Party:	Ivan Ruff							
Concern Info:	Employee at Park Hill High School is concerned about asbestos containing tile being removed in three rooms at the school. He says they have been grinding tile with no enclosure. He has seen chipped tile and tile that looks ground. There is dust left on equipment the kids use. He is most concerned that the area wasn't blocked off and you can just walk in with no restrictions. There are broken pieces of red asbestos warning tape on the floor in the area. He says the contractor doing the renovations is Universal Construction.							
Conclusions:	This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58292	6/21/2024	6/25/2024	Jeff Eddy	Open Burning	Milan /Sullivan	NERO	BH	Letter AC
Concerned Party:	Anonymous							
Concern Info:	Caller states source of concern Burned tires on June 1.							
Conclusions:	On-site visit No visible burn sites. No one at residence. Left contact information and PUB 2047. On 7/8/24, a letter was sent requesting that contact be made with NERO to discuss the concern.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58296	6/28/2024	7/2/2024	AA Quarry	Fugitive Particulate Matter	Kingsville /Johnson	KCRO	CK	Site Visit
Concerned Party:	Todd Remington							
Concern Info:	My family lives due north of the quarry there off AA Highway in Kingsville, Mo and we have been having a heck of time with the dust drifting onto our farm. The attached picture is from a table inside our screened back porch on the south side of our home. We live at the end of our 1/2 mile driveway with the closest gravel road a mile away. Now please correct me if I'm wrong but with the new silca laws in place through OSHA isn't the dust drift from mining practices supposed to be contained within the boundaries of the mine property? Wasn't sure if you could help me with this? John Rushly, Manager Office: 816-566-2300 Mobile: 816-406-4729 jrushly@aaquarry.com							
Conclusions:	It appears that dust from AA Quarry has gone past their property boundary. Particulate matter was observed on surfaces beyond the quarry's property boundary that appear to originate from the quarry's operations. An unsatisfactory findings letter will be issued to AA Quarry.

58297	7/1/2024	7/2/2024	Webster Primary Center	Fugitive Particulate Matter	Webb City /Jasper	SWRO	BD	Phone Conversation
Concerned Party:	Vicki Lett							
Concern Info:	Caller said that on Saturday, June 29, 2024 the Webster Primary Center in Webb City had their parking lot cleaned, and that the crew used big fans to blow the lot off. The caller said the duct and dirt particles were blowing all over the neighboring houses, and it was hard to breathe outside. She is concerned about people breathing the dust and that they did not give anyone prior notice.							
Conclusions:	SharePoint #10077. No violations of 10 CSR 10-6.170 were observed and are not expected to happen again due to the nature of the activity. Since the parking lot restoration is complete, there is no further activity at the site that would generate any fugitive emissions.

Concern Info:	I'm not sure who to contact about an awful smell at night in St Joseph. I have only moved here within the last few years. I live in a very old brick and stone house near downtown I'm trying to restore. I don't have AC and probably never will. I open my windows later in the evenings to cool the house down. Once the night progresses there is a smell that at times is worse than others, but is bad, nonetheless. Last night July 6 the smell was so unbearable I couldn't sleep; it was so strong I felt nauseous. It's a strong odor like a rendering plant. It lasted clear through the night. The weather has been wonderful and cool at night for it being July. I would appreciate it if someone could check into this. If not tell me who to send this to.							
Conclusions:	No odors were detected during the investigation, and a potential source could not be identified. The concerned party agreed to keep the department informed if the situation continues.

58383	7/3/2024	7/8/2024	Glacken	Open Burning Hazardous Air	/Jefferson	SLRO	TK	
Concerned Party:	Orval Nobles							
Concern Info:	Received an open burning and freon concern from the DNR website. The CP states "I have a short video and photo of scrapping operations at Dittmer Automotive. I have witnessed them burning electrical and rubber. Possibly openly releasing freon from hundred of refrigeration units, also witnessing transmission and oil spills onto their grounds. The property adjoins an elementary school, is nearby to St. Martin's UCC church. This yard is directly in front of Hwy 30 with no fencing and continues to be both an eyesore and hazard year after year. I called the county code enforcement office in Hillsboro, Mo. but was told that the Glacken family doesn't comply and that the courts will not enforce the law.							
Conclusions:	<p>I wish to send photos and a yard video (open burning) evidence to you. Please provide your contact info to me."</p> <p>7/3/24-RLA- I contacted the EPA tip line and forwarded them the concern about freon being released into the air. 7/8/2024-TKK-I emailed the concerned party and let them know I would be investigating and that they could send any photos or videos to my email. I then investigated the concern site, arriving at 11:11, and met the Owner. He stated that he has a refrigeration service come and remove the freon from any refrigerant condensers but can't remember the business name. I told him that I need him to email it to me as soon as he gets it from his wife. The burn pile out back had a few small pieces of metal wire in it but was mostly made up of tree branches. Also, none of the metal pieces had been burned yet. He stated he doesn't burn any furniture or appliances.</p> <p>The property itself looked like a metal scrap yard with dozens of refrigerators, washers, dryers, ovens, car parts, barbed wire rolls, hot water tanks, grills, and numerous other household appliances that can be scrapped for their metal. The ground had numerous small oil / chemical stains but no visible large spills.</p> <p>The owner stated that the county had spoken to him and he was going to get the place cleaned up but had been waiting until his truck was running again as he couldn't haul anything.</p> <p>I informed the owner about ensuring he is disposing of freon properly, ensuring that all spills are cleaned up, and the items that he cannot burn. I left him with fact sheets on open burning and disposal of freon.</p> <p>7/8/2024-TKK-I emailed the owner and gave him two days to send me who he uses to dispose of his freon.</p>

58384	7/8/2024	7/8/2024	Unknown	Other	SLRO /Lincoln		CW	
Concerned Party:	Renee Clark							
Concern Info:	We received an environmental concern from the DNR website. The CP states "I have been attempting to obtain information about the cloud seeding and chem trail operations to no avail and I am hoping you may be able to guide me. I have allergies and each time the spraying operations take place over our area, I have trouble with my allergies. Jay Ashcroft mentioned that the two operations are different and I want to know the ingredients of the chemicals being sprayed for each operation so that I can determine which ingredients are affecting my health. It also appears to be affecting my livestock when it is done. Who has the information that I need? "							
Conclusions:	Had a phone conversation with concerned party on July 8, 2024. CP explained that planes had been spraying chemicals over her property that affected both her and her livestock. CP wanted to know how to find out what ingredients/chemicals were being used. CP mentioned she knew planes were spraying chemicals because on the same day some planes left trails and some planes didn't. I explained to her about the formation of contrails and the multitude of factors that play into whether or not contrails are formed, such as weather conditions, altitude differences, and fuel type. I told her that the DNR does not keep track of aviation related releases and suggested contacting the FAA or using flight tracking software to find out information on the owners of the aircraft in question if she wishes to investigate further. As the DNR does not do source air inspections for mobile sources, I also provided her information on how to file a report with the EPA as well.

58387	7/2/2024	7/2/2024	Unknown	Odor	SLRO /St. Louis City		HH	
Concerned Party:	Jason Williams							
Concern Info:	Received an odor concern via the DNR Website. The CP states "My wife and I are longtime residents in the STL area and we spend a lot of time around the Botanical Garden, Tower Grove, and Forest Park. We noticed sometime last year a strong acrid smell in the air around these parks, something artificial like burning plastic or some kind of chemical. It seems like a newer thing, within the last several years. We have even smelled traces of it as far as Webster Groves, where we live. While walking on July 1, 2024 at around 6:30 PM there was this same strong smell around Forest Park, so much that we had to wrap up our walk early as the smell was just too strong. We are noticing this same exact smell in the air quite frequently when spending time in these areas. Something has changed in the area but we are not sure where it's coming from. I did notice the winds were moving east on the 1st which would indicate it was coming from the downtown or east side, but we have not tried to seek out the source. I understand there are open complaints about this...it's a really mark on the city this kind of thing, we can't even enjoy our beautiful green spaces like we once could."							
Conclusions:	7/2/24-RLA- The area and the smell the CP is describing appears to be similar to the odor concerns we associate with the South St. Louis Odor. I looked up the weather data and the wind appears to be generally from the east to the west on July 1, 2024.							
	On 07/03/2024 about 9:30 AM. I drove to Forest Park and South Kingshighway and looped around the south St. Louis City, I did not notice any foul odor.

Concerned Party:	Anonymous										
Concern Info:	Received an odor concern from the I-270/70 Area Online Odor Concern Form. The anonymous CP stated there was a mild rotten egg odor at 4041 Chouteau Ave, St. Louis										
Conclusions:	Arrived at 4041 Chouteau Ave. at 10:10 on July 12 2024. No odor was present at that time. Continued searching in a grid pattern around the location for 10 minutes and was unable to find any odors.

58484	7/14/2024	7/15/2024	Unknown	Odor	/St. Louis City	SLRO	RA				
Concerned Party:	Haley Smith										
Concern Info:	We received a odor concern from the online 1-70/270 Area Online Form. The CP states I'm not sure where it's coming from. It meets us when we come outside to leave or when we come back home. Today is the worst it's been, though we have noticed it off and on for a week or so. I think my neighbors had a sewer or pipe issue sometime ago, and while that did also affect us next door, that smell was not like what this smell is like. Death. Decay. Maybe it's in this tree in our yard. It's not inside the house whatsoever.										
Conclusions:	7/15/24-MCL- This concern is located 16.6 miles to the north of the I-70/I-270 Area Odor Complaint Target area. I conducted a Google search of the area surrounding this address and was unable to identify any industrial sources. This most likely doesn't involve the the I-70/I-270 Area.

58524	6/21/2024	6/27/2024	Moberly WWTF	Odor	Moberly /Randolph	NERO	JH	Phone Conversation
Concerned Party:	Anthony Kitchen							
Concern Info:	Via email: It's an ongoing issue that was a little better before but seems to have came back. It's the Moberly MO smell that's coming from the Waste Pond on the East side of town. It's really bad when I open my window. I have spoke to a DNR person who has came and tested around and says it's not detectable. I suggest you all test in my apartment through my Window or right outside my apartment window. I have to keep shutting my window because its stinking out my apartment. It may be the mulch in front of my apartment complex BUT we have drove around and have smelled this smell on the outer highway when the wind was blowing north and down Rollins street when the wind was blowing west. I ask that you all test right here at the corner of Morley St and Taylor where the 3 story apartment complex is or even stand right in front of my apartment windows and test or come inside and test from inside my apartment. The smell is awful and the same exact smell we have been smelling around town. It got better but seems to have came back. I think the area of the pond and being my Apartment complex is higher up means the smells are above the trees and houses and can only be test in front of my apartment complex or inside it at my window to be able to verify this issue. I can be available if needed so you all can smell it coming through my window or in ore you all to test right outside my window. It's an awful smell. If the mulch is causing this smell by any means wouldn't that also be a DNR issue since it's creating a smell that drifts away from he properly into others properties? It's worse at my window because I think the wind blows smells and other air borne things along my building and I'm one of the few who has their windows open all the time unless the smell gets so bad my apartment is stunk out from that nasty pond sewer smell. You all could also test around the LW Case Building to rule out or verify if it's the mulch. I have had quest who smell this, we have drove around and smelled the same smell on multiple different streets.							
Conclusions:	No violations of the Missouri Odor Regulations were observed at the time of the investigation.

Concern Info:	Email states, "I smell if coming through my window. I honestly don't know what it's from or where's it coming from. It's a horrible smell. It does bother my eyes and makes me sick to my stomach. We thought it was a other issue but apparently I'm told it's not that issue. So this issue is awfully bad, you can come to my apartment and smell it for yourselves from 8am to 11am. It can be smelled throughout the day but it's worse right now. I've contacted the apartment managers and they never tries to find the source. I have reported this to DNR before but they said it wasn't the waste Pond. You need to come to my apartment and smell if for yourself."							
Conclusions:	No violations of the Missouri Odor regulations were observed at the time of the investigation.

58545	7/9/2024	7/9/2024	SA Recycling	Opacity	SLRO /St. Louis City		SL	
Concerned Party:	Patrick LeFARTH							
Concern Info:	7/9/24 SEL I received an email from Patrick Lefarth regarding smoke emissions coming from SA Recycling: "They started using a sprayer the other day but have stopped using it and are continuing to burn. Today there is a heavy grey smoke that intermittently engulfs the McKinley bridge." 7/10/24 SEL received a second email from Patrick Lefarth : "Thank you, wanted to inform you they are burning wires and other things again today 7/10/24, causing a very noxious smoke causing several coworkers headaches and nausea"							
Conclusions:	7-9-24 I spoke with Daniel Reed regarding the ongoing compliance issues at SA Recycling. I replied back to Patrick LeFARTH that I would be investigating the concern next week due to schedule availability.							
	7/17/24-							
			I conducted an investigation of SA Recycling with Miranda Cason. We arrived at Branch Street and parked adjacent to the Kiesel Company and Advantage Metals Recycling. We were able to walk roughly a half mile up the McKinley Bridge Bikeway, and position ourselves approximately 50ft above and 400ft east of the facility. Torch cutting was being conducted, and smoke emissions were noted.					
			I began a Method 9 observation of the torch cutting at 9:48am, and conducted a 30-minute observation, ending at 10:17 (Attachment #1). I was positioned east of the torch cutting area, with the sun at my back.. There were two employees conducting the torch cutting, and I conducted the observations on the employee to my right. A 6-minute Method 9 observation from 10:00am to 10:05am had an average opacity of 28.958%, with the highest reading of 100%. A 6-minute Method 9 reading from 10:06am to 10:11am had an average opacity of 39.583%, with the highest reading of 85%. A 6-minute Method 9 reading from 10:11am to 10:17am had an average opacity of 29.583%, with the highest reading of 75%.					
			During the investigation the facility had a mist sprayer operating. The sprayer was approximately 20ft tall and was positioned to spray mist over the torch cutting area. The mist sprayer did not appear to limit smoke emissions. Method 9 Observations were taken below the mist spray out area. On multiple occasions smoke emissions traveled above and away from the sprayer.					
			An email was sent to Jim Tijerina in the afternoon and informed him of the findings. Information of the violation was sent to the APCP enforcement unit.

58638	6/24/2024	6/25/2024	Pleasant View Apartments	Open Burning		SLRO /Franklin	PG	
Concerned Party:	Anonymous							
Concern Info:	<p>An anonymous concern was received from the DNR website. The CP states "PLEASANTVIEW APARTMENTS just outside of Washington MO (Franklin County) has been piling up trash and demolition building materials and setting them on fire. The fire department has already been there once but I am unaware of anything that was done since the guy continues to burn this huge pile he keeps adding to. I thought that at least 90% of the items on the pile are listed as prohibited items on your page I want to know why he continues this practice endangering everyone around. The pile is behind a couple of the buildings and he has even cut pathways to throw items on the pile when he empties apartments and guts them. It has been a messy job to as there are trails of building materials littered about on the way to the hazard. gregory cole is the person doing this and his partner cathy roberts. greg is the son of the owner connie cole. All are aware of this pile and the burning. When tenants complain she brushes them off and tells them to just ignore her son because he is violent and not to cause problems. so he is allowed to run rampant doing anything he wants with no consequences. If a tenant complains several have been forcibly removed "self eviction" and we have seen lots of personal belongings on the pile after they quickly move out.</p> <p>burning: fiberglass, carpet, old cabinets, plastic drawers, building material, furniture, mattresses, tv (electronics), flooring, treated material and non treated material, etc "</p>							
Conclusions:	<p>Tate Kitchell investigated the site and observed the items that were removed from the apartments. No more signs of open burning were observed though. I contacted Connie Cole and informed her that we received another concern from her property, and that there is still an open Letter of Warning from the last visit. Connie stated that they do not intend to burn the material and that it will be disposed of properly at a land fill. On 7/18/2024 I received a signed open burning acknowledgement form from Connie Cole, and closed the previous LOW.</p>

58737	7/12/2024	7/12/2024	Faye Parks	Open Burning	/Jefferson	SLRO	TK	
Concerned Party:	Anonymous							
Concern Info:	Received a concern from the DNR website. The CP states I have a neighbor next door who continually burns their kitchen and bathrooms waste and it fills the air for hours before it clears. Is that legal? The fire department has been here at least 5 times. I have asthma and I find it hard to breathe.							
Conclusions:	7/12/24- I looked up the address on satellite imaging and the property appears to be a mobile home. I searched our records and we have not had a concern at this property before. PARKS ALICE FAYE 3707 E FOUR RIDGE RD IMPERIAL, MO63052 Occupancy: Mobile Home							
	7/18/24-TKK- I visited the site and the homeowner gave me access to her burn site. The burn area was very clean there was only woody waste within the burn barrel. I noted nothing that should not be burnt.							
	I explained to her what can and can't be burnt and left the fact sheets with her.							
	I called the Jefferson County Code department and let them know.

58738	7/9/2024	7/30/2024	Russell Farrah	Open Burning	/Lincoln	SLRO	RB	
Concerned Party:	Anonymous							
Concern Info:	Spoke with the CP about a property at 100 N Ethlyn Rd, WInfield MO. The CP claims that the AP (alleged party) is Russel and Bonny Farrah. According to the CP, the AP are heavily on drugs and maybe violent. They have restarted open burning of materials that give off an offensive odor. The burning is taking place in a smoker, so the CP cannot see what materials are burning but stated that "it definitely cannot be wood with the smells coming from the fire". The AP burns multiple days, at all hours. The CP has noticed the smell heavily around lunchtime. The CP contacted the fire department earlier in spring regarding the burning but does not believe the fire department did anything about the issue. The AP is supposedly the son of the property owner, Randy Farrah.							
Conclusions:	7/15/24 I conducted a site visit to determine what item was being used for potential open burning. It was deemed to be indeed a smoker on the corner of the property, but no burning was occurring. I did not see or smell smoke. Later that same day I emailed the owner as this is the second concern I have been assigned at this address. Farrah responded with alertness to the issue and stated he would have the smoker moved, but was unaware it was even on the property. He mentioned he would respond back to me when it was moved.							
	On 7/30/24 around 1 pm I traveled to the concern site. The smoker has been moved and no open burning was present. It would appear the issue has been resolved for now. It was never clear if any improper burning was occurring in the first place, but because the owner was willing to work with us and have it moved from that edge of the property, we were able to make some progress in the matter.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58739	7/15/2024	7/15/2024	GMC Plant	Odor	SLRO /St. Charles		SL	
Concerned Party:	Elizabeth Schoenberg							
Concern Info:	We received a concern from our DNR Environmental Concern website. The CP stated: "A couple of years ago I reported a strong smell. It turned out to be the GM plant. That same smell is around the area daily. I know last time they said it was paint sludge that needed to be cleaned. I think this needs to be addressed again if the plant is in Wentzville and I can smell it in lake Saint Louis."							
Conclusions:	7/15/24- I contacted Elizabeth regarding the concern to receive more information. Elizabeth stated that the odor is mainly present in the morning, around 8am. I told her I would conduct an investigation of the odor and an inspection of the Wentzville GM plant the following week.							
	7/24/24- This morning I conducted an investigation of the area, and was not able to find any obnoxious odors. I arrived at the area around 9:55 and drove around the neighborhood for roughly 15-20min, stopping frequently. I did not notice any odors at any point. Since no odors were observed, I did not conduct a nasal ranger observation.							
	After conducting the investigation, I conducted an air inspection of Wentzville GM Plant. During the inspection, I did not notice any foul odors outside of the plant. I spoke with the facility representatives about the issue, and asked them to reassess their facility and ensure that the odors are not coming from the plant. The facility stated they have significantly reduced the size of the paint sludge tank (the initial cause of the odors previously), and now it circulates more frequently decreasing any odorous sediment or sludge build up. I was shown the paint sludge tank area, and did notice an odor while inside the building, but it was not noticed outside of the building and area. I drove around the facility following the inspection, and did not notice any odors off of the property.							
	No violations were noted
